- MySQL (In Progress)

Jacob Fetty

Industrial Engineer | Intelligence Analyst | CAD & Data Solutions

Greenville, NC • (252) 481-7578 • fettyj10@gmail.com

PROFESSIONAL SUMMARY

Industrial Engineer with experience spanning engineering support, military intelligence, operational planning, and technical analysis. Proven record of leveraging engineering principles, intelligence analysis, and emerging software development skills to solve complex operational problems and support data-driven decision making. Experienced with AutoCAD, SOLIDWORKS, MATLAB, SQL, Git, GitHub, Visual Studio Code, AI-assisted workflow development, and holds an Active TS/SCI Security Clearance.

PROFESSIONAL EXPERIENCE

United States Army — Military Intelligence Analyst / Mission Manager

- Collected, analyzed, sanitized, and disseminated 1,200+ intelligence products supporting joint operations, contributing to the capture or neutralization of 375+ high-value targets.
- Served as APG Mission Manager tracking operational activity across CENTCOM and SOUTHCOM areas of responsibility.
- Applied intelligence fusion, predictive analysis, pattern analysis, and threat assessment to support commander decision-making.
- Coordinated dissemination of actionable intelligence while maintaining strict security and information-handling standards.

United States Army — Recruiter / Operations Specialist

- Built strategic partnerships with schools, community leaders, private organizations, and key influencers to expand recruiting outreach.
- Exceeded individual recruiting mission by 20% during a historically challenging recruiting environment.
- Leveraged operational metrics and trend analysis to optimize recruiting performance and mission success.

EDUCATION

Bachelor of Science, Industrial Engineering
East Carolina University

CORE COMPETENCIES

Engineering Analysis • Intelligence Analysis • CAD Design • SQL Databases
• Data Analytics • Business Intelligence • Operational Planning • Process
Improvement • AI Prompt Engineering
